PROFILE

Computer Science graduate (First Class Honours) with internship experience developing Python ETL pipelines, distributed systems, and machine learning applications. Experienced building scalable full-stack applications, microservices, and data-driven solutions using Go, Python, FastAPI, PostgreSQL, Docker, and Kubernetes.

EDUCATION: Technological University Dublin

BSc (Hons) Computer Science

(Infrastructure) — First Class Honours

(1.1) GPA 3.6/4.0

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Software Engineering, Networking

PROJECTS

NextPlay: Personalised Game Recommender System (*Final Year Project*)

Link: <https://nextplay.up.railway.app>

Developed a distributed, full-stack web application that delivers personalized game recommendations using machine learning and user interaction data, addressing the challenge of content discovery in large-scale digital marketplaces.

- Developed a distributed full-stack recommender system (NextPlay) delivering personalized game recommendations using a Keras-based ML model trained on user interaction and questionnaire data.
 - Designed and implemented microservices architecture using Go (Fiber), Python (FastAPI), and PostgreSQL.
 - Built and integrated a data pipeline to process large-scale game metadata, enabling efficient model training and improved recommendation quality.
 - Implemented real-time recommendation updates based on user interactions, increasing personalization and user engagement.
 - Containerised services with Docker and deployed using Kubernetes, improving scalability and system reliability
-

Convolutional Neural Network (From Scratch) [Link](#)

- Built a convolutional neural network from scratch in Java, achieving 93% accuracy on image classification tasks
 - Implemented multithreading to improve training performance and computational efficiency
 - Visualised training metrics across epochs using a custom GUI
-

CKAN ETL Pipeline

- Developed Python ETL pipelines to automate dataset cleaning and ingestion, significantly reducing manual processing time.
 - Integrated with the CKAN API to automate dataset uploads and reduce manual processing time
 - Built and deployed a Windows service to automate web scraping and dataset publication, improving scalability of data workflows.
-

Technical Skills

- **Languages:** Python, Go, Java, TypeScript, C, SQL
 - **Frameworks:** FastAPI, React, Fiber, PyQt6
 - **Data & ML:** Machine Learning, Data Pipelines, Keras
 - **Tools & Technologies:** Docker, Kubernetes, PostgreSQL, Power BI, Git, MongoDB, REST APIs
-

Work Experience

Dublin City Council: Data Analyst Intern, Dublin, January 2025 – August 2025.

- Developed Python data pipelines to automate dataset cleaning and ingestion, significantly reducing manual processing time
 - Delivered 10+ Power BI dashboards used across departments to support operational and strategic decision-making
 - Collaborated with 20+ stakeholders to gather requirements and deliver tailored data solutions
 - Built a Windows service for automated data scraping and publishing, improving scalability of data workflows
-

Leadership Experience

TU Dublin Student's Union

Class Representative, Grangegorman, Dublin, September 2023 - Present.

Advocated for classmates, addressed course concerns, and coordinated timetable changes for 50+ students. Improved student-lecturer communication and trust.

Certification

- AWS Cloud Practitioner Essentials (Course) – Amazon Web Services
- Cisco CCNA: Introduction to Networks (CCNA 1)
- Cisco CCNA: Switching, Routing, and Wireless Essentials (CCNA 2)
- Cisco CCNA: Enterprise Networking, Security, and Automation (CCNA 3)
- NDG Linux Essentials
